

CATEGORIZE

Data Classification

- SOX – Integrity of source data related to financial transactions and disclosures
- PCI DSS – Aims to secure credit and debit card transactions against theft and fraud
- HIPAA – Protected health information
- GDPR – Privacy and personal data protection

Data Classification

Medical records will be classified under HIPAA and we can use the HIPPA compliance checklist as a guideline to determine what set of controls to apply to the data.

Data Classification

The level of protection will depend heavily on the risk tolerance the business has towards the data.

Data Classification

Not all data should be classified as high or low protection.
